

4/30/19 Email:

The Department has reviewed the dust control plan submitted by Hanson, the core drilling plan, and the response to comments submitted by EarthRes.

The Department authorizes Hanson and Pierson to conduct exploratory core drilling and boulder field sampling as described in the attached plans. All operations must be conducted in accordance with the dust control measures described below.

Mining and related activities remain under the standing cessation order. Any site activity is to be in support of exploratory core drilling and boulder sampling efforts only.
